

Start-all.sh → This command starts all the hadoop services that we can verify using jps command.

Jps → This command is used to check whether hadoop services are running.

Hadoop services like name node, secondary name node, data node, job tracker, task tracker.

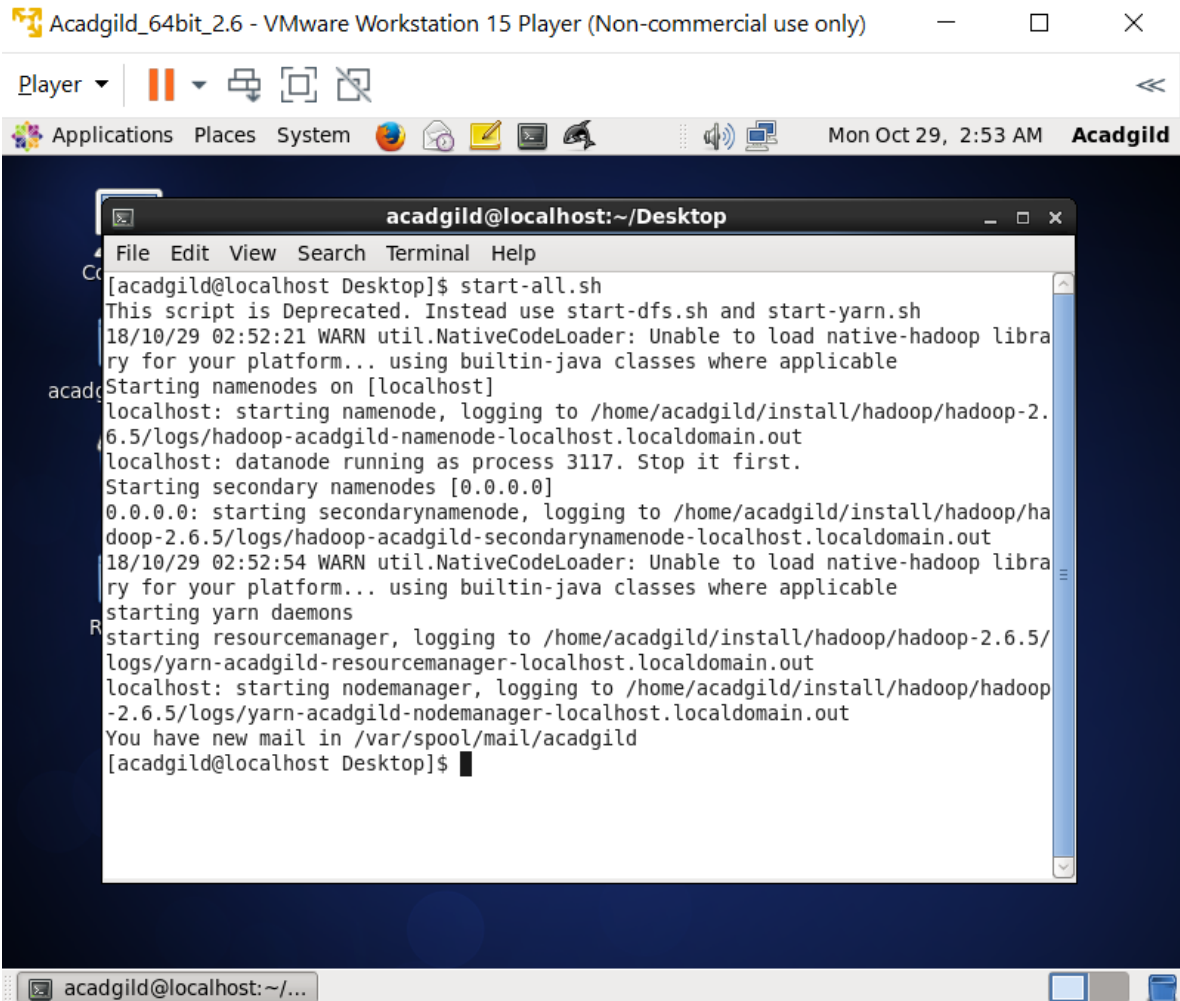

Pwd → Present working directory. To know the path of working directory.

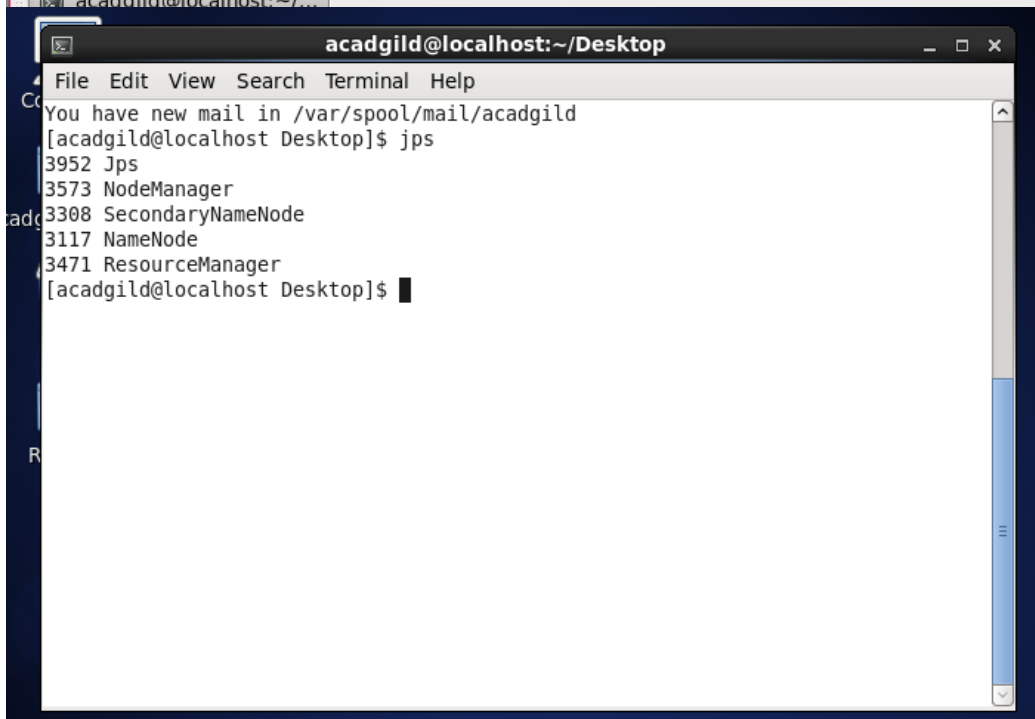

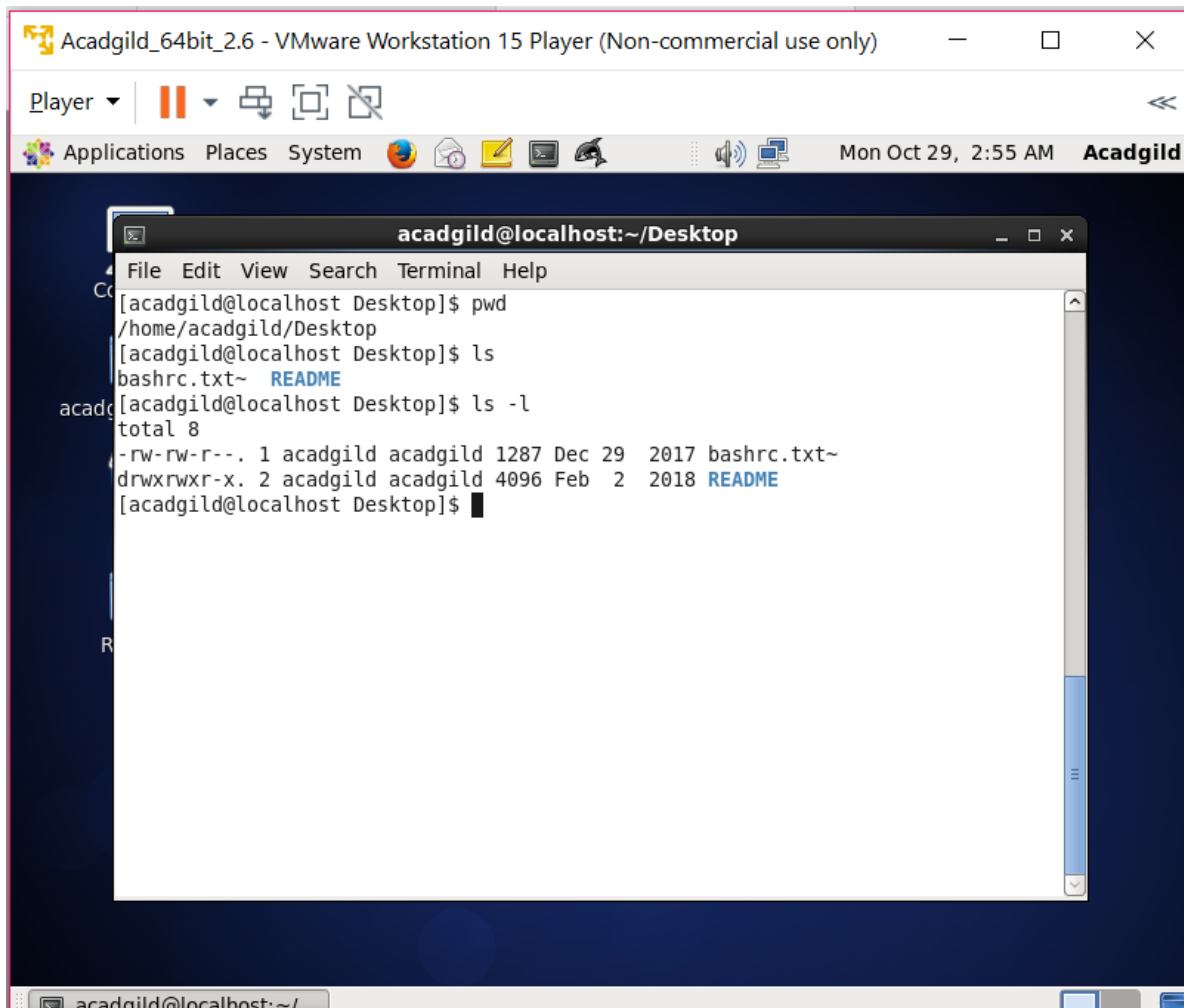

Ls → to list files and folders in current directory.

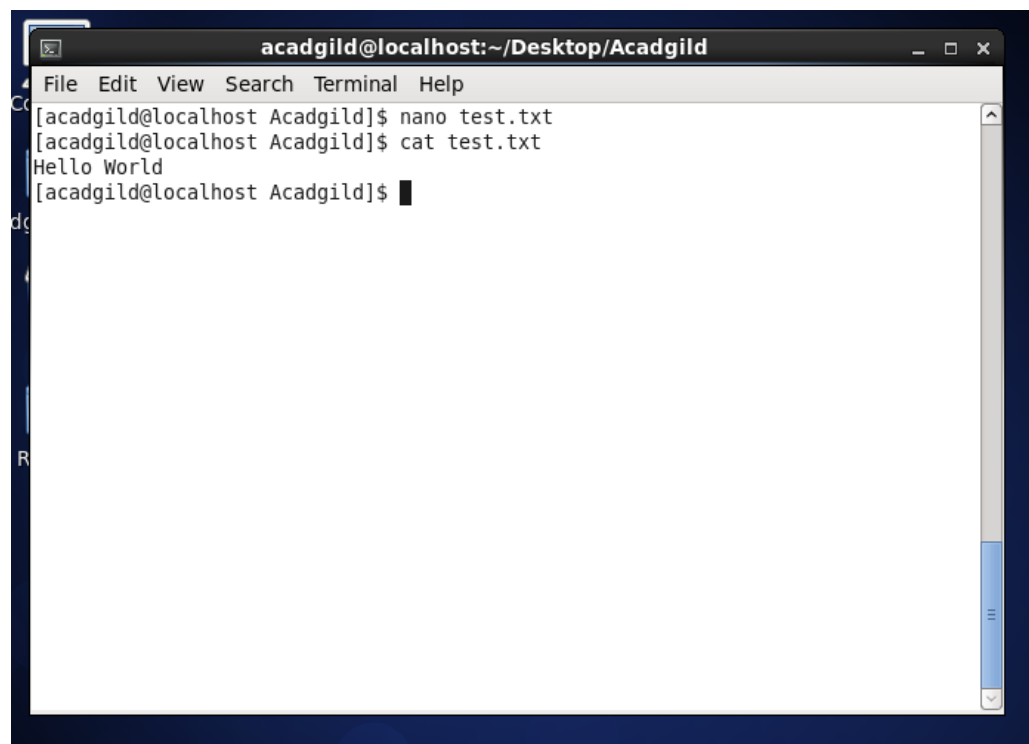

Ls -l → long listing files and folder in current working directory.

Nano → this command is used to create a file in current directory.

Cat → this is used to get the content of file.

A terminal window titled 'acadgild@localhost:~/Desktop/Acadgild' with a menu bar (File, Edit, View, Search, Terminal, Help). The terminal shows the execution of 'nano test.txt', 'cat test.txt' (outputting 'Hello World'), and the prompt returning to the shell.

```
acadgild@localhost:~/Desktop/Acadgild
File Edit View Search Terminal Help
[acadgild@localhost Acadgild]$ nano test.txt
[acadgild@localhost Acadgild]$ cat test.txt
Hello World
[acadgild@localhost Acadgild]$
```
